

# BG-24T Perennial Ryegrass Blend

## Key Features

---

BG-24T is ideal for a pasture situation. It also makes high quality haylage and Baleage. Its seedling vigor and rapid establishment make it an excellent product to overseed an existing pasture. BG-24T is a blend of improved perennial ryegrass varieties. This unique formulation combines the benefits of both diploid and tetraploid varieties. Diploid varieties form a denser sward and are more persistent. Tetraploid varieties are higher yielding, more palatable, and have improved disease resistance. BG-24T is an excellent choice for grazing or high moisture cutting systems. BG-24T is an earlier maturing blend to promote early growth before the hot summer conditions. This adds to the the pasture yields both early spring and late summer.

## Applications

---

Haylage  
Pasture

## Planting Time

---

Spring & Fall

## Management Keys

---

Perennial ryegrass requires fertile soils and adequate nutrients. For optimal production and persistence grazing management is crucial. As a lower growing plant maintain forage production through frequent grazing during the growing season. Perennial ryegrass performs best on fertile healthy soils with plentiful water supply. Warm days and cool nights will keep BG 24T growing longer into the season.

## Characteristics

---

Dry Hay	2
Persistence	3
Forage Quality	5
Baleage	4
Silage	4

Scale 1-5 (1 = Poor, 5 + Excellent)

## Seeding Rate

---

New Seeding - 20 -25 lbs/acre  
Overseeding - 10-15 lbs/acre

## Seeding Depth

---

No deeper than 1/4"
